

A. SALMAN MARICAR

STUDENT

ABOUT ME

AI & Data Science student with practical experience building and refining Generative AI systems, including a virtual try-on model. Proficient in Python, image processing, and model debugging, with strong analytical and problem-solving skills developed through real-world project work. Actively involved in international research conferences across different countries, staying current with emerging trends and challenges in AI.

SKILLS

- Python programming (intermediate)
- Generative AI & image processing/masking
- Model debugging & performance optimization
- C programming, SQL basics
- OCR & document verification systems

LANGUAGE

- English
- Tamil
- Hindi
- Japanese

CONTACT

- +91 8248744349
- salmanamaricar@gmail.com

EDUCATIONAL QUALIFICATIONS

Bachelor of Technology (AI & DS) (B. S. Abdur Rahman Crescent University, Chennai)	Ongoing	Current CGPA: 8.9
Grade 12 (Cauvery Public School, Karaikal)	May 2024	80%
Grade 10 (Cauvery Public School, Karaikal)	May 2022	81%

ADDITIONAL QUALIFICATIONS

CERTIFICATION COURSE:

Simplilearn

- C Programming Basics

HackerRank

- SQL (Basic)
- Python (Basic)

INTERNSHIPS

Genesys Research & AI Labs (grail), Puducherry - 605001

Position: AI Developer

Duration: 2 Weeks

Tasks:

- Built and tested a Generative AI virtual try-on system for 3D outfit visualization.

Innolift Ventures, Chennai

Position: Full Stack AI Developer

Duration: 2 months

Tasks:

- Built and tested a Generative AI virtual try-on system for 3D outfit visualization.

PROJECTS

Academic Certificate Authenticity Validator (Smart India Hackathon Project)

- Developed a machine learning-based system to detect forged and manipulated certificates.
- Implemented OCR and verification pipeline for authenticity detection.
- Built a practical solution to streamline document verification for institutions.

NeuraDocCluster AI: Intelligent Hierarchical Document Organization System

- Developed and tested a Generative AI virtual try-on system for 3D outfit visualization using Python.
- Performed image preprocessing, masking, and output optimization to improve virtual garment alignment and model accuracy.
- Collaborated on AI model testing, debugging, and performance enhancement for image-based virtual try-on applications.

PUBLICATIONS

- Participated US conference- A. S. Maricar, "AI-Powered IoT Security: Multi-Dataset Evaluation of a Deep Learning Intrusion Detection Framework," 2025 IEEE International Carnahan Conference on Security Technology (ICCST), San Antonio, TX, USA, 2025, pp. 1-6, doi: 10.1109/ICCST63435.2025.11293924. keywords: {Deep learning;Accuracy;Explainable AI;Intrusion detection;Feature extraction;Bayes methods;Security;Convolutional neural networks;Internet of Things;Optimization;Convolutional Neural Network (CNN);Deep Learning;Recursive Feature Elimination (RFE);Explainable AI (XAI);Intrusion Detection System (IDS)},
- Paper has been accepted - IEEE conference, The Sixth International Conference on Emerging Techniques In Computational Intelligence, AUGUST 19-22, 2026 | Hyderabad, India
